

BUSY BEE
CLEANING CO.

JOB ORDER AND BOOKING SYSTEM

Project Proposal

Marlon Villarama, August 2025

The Problem We Are Solving

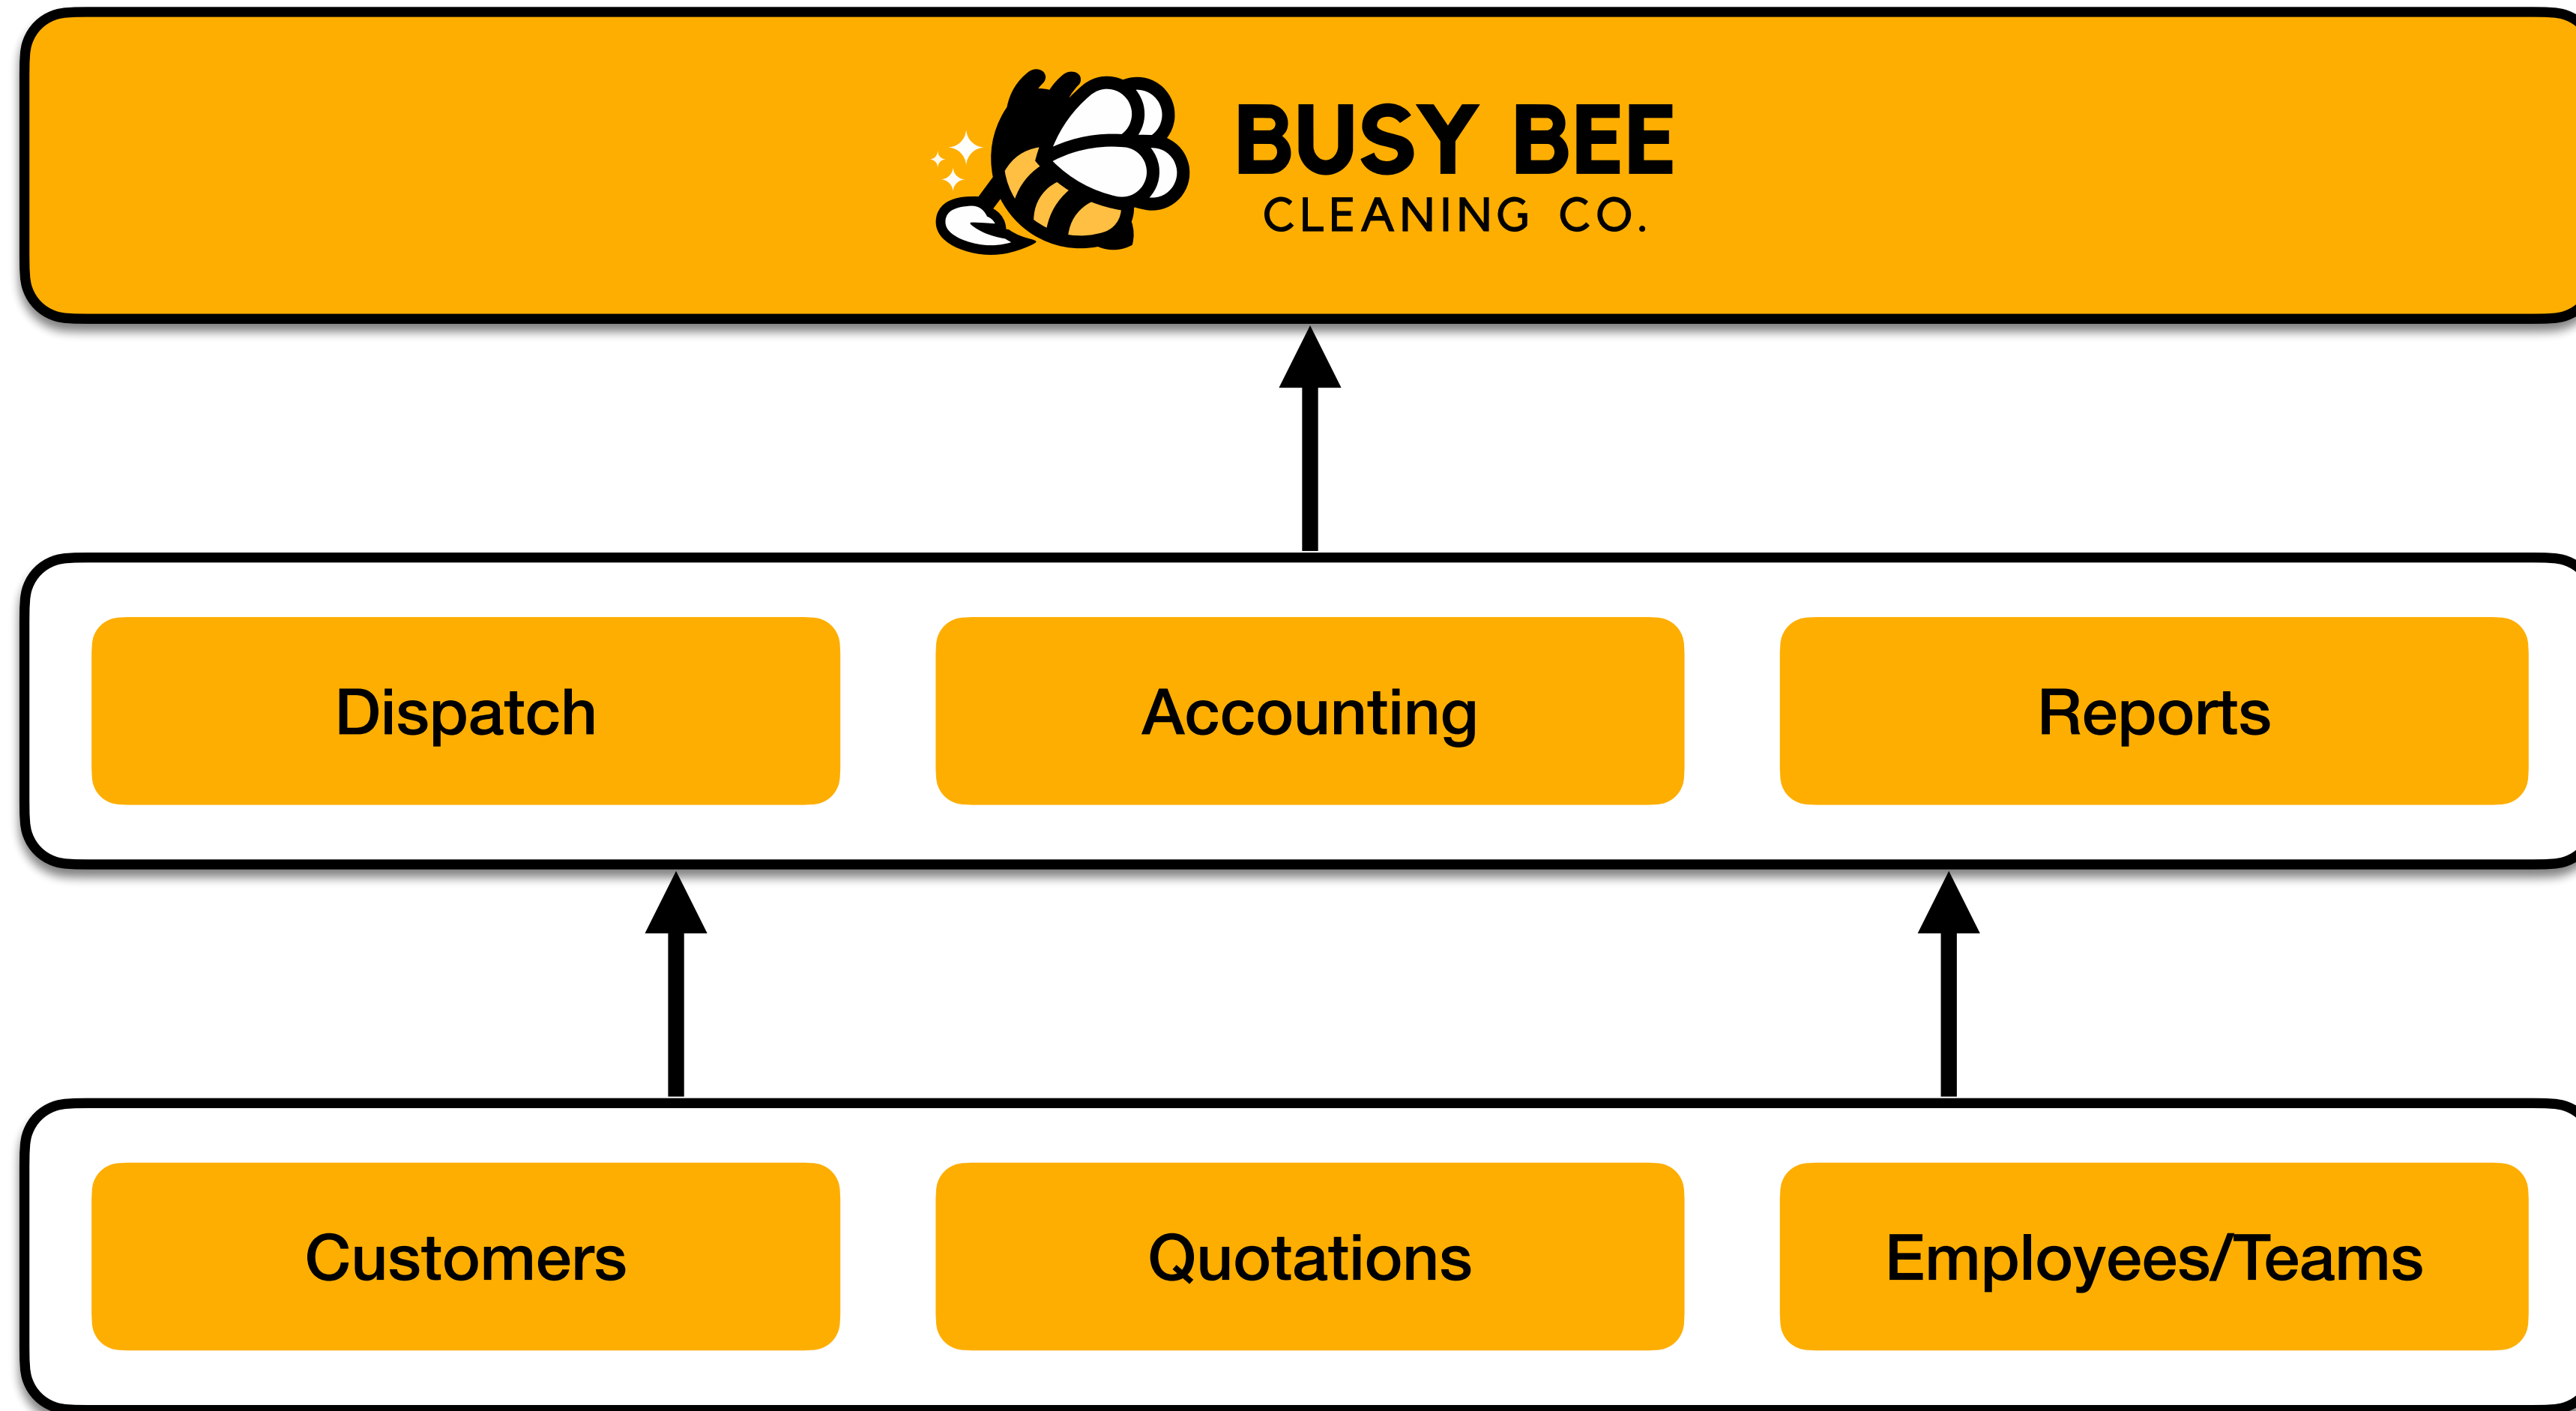

- The business is growing and quickly expanding locations.
- Multiple spreadsheets are used to manage customers and bookings.
- Separate forms/systems are used to intake customer and booking data.
- Data may be redundant across multiple stores, impacting integrity.
- No/limited transaction audit trail/history.

The Solution

Create a single system to:

- Quickly and easily access real-time data across the organization.
- Unified data management for customers, service bookings, and employees.
- Provide a continuous and complete view of a service booking's life cycle.
- Ensure data integrity and security.
- Provide stakeholders with timely, accurate reports.

The Solution
